Thermage Pre/Post Op Sheet

Pre Instructions:

- Inform your physician if you have a pacemaker, ICD, or ANY electronic implanted device. It is not safe to perform Thermage with these devices.
- If you are having a Thermage EYE treatment performed, please inform your physician if you have had any eye surgeries in the past year.
- Inform your physician if you are on chronic NSAIDs (Aspirin, Ibuprofen).
- Stop taking aspirin or ibuprofen 7 days prior to your treatment.
- You should not be pregnant or breast feeding.
- Please remove all make up prior to your treatment. Do not wear contacts or eye makeup for Thermage EYE treatments.
- Dress comfortably.

Post Instructions:

- You may have minimal redness and swelling immediately after the treatment. This typically fades very quickly within hours.
- There are no physical restrictions after the treatment.
- Please discuss when to resume your NSAID'S (Aspirin, Ibuprofen) with your physician.
- Please be patient. It can take up to 3-6 months to see the results. Results may vary.
